A	Fine Center Dot	F	"Floating" Design
B+C	1/10 MIL Scale	G	Windage Indication #
D	1 MIL Hash Lines	H	Holdover Indication #
E	0.5 MIL Hash Lines	●	Illuminated

# DESIGN FEATURES

APR stands for “All-Purpose Reticle”, and that’s the concept behind the design of the APR-1C & APR-1D. The “C” is the “clean” or simplified version, with no holdover dots off the vertical axis and an easy-to-use design that is kind on the eye.

## MIL-SCALE:

The Mil-Scale on the horizontal & vertical crosshairs allow the shooter to measure objects downrange and quickly make adjustments. With one division equalling one click, the guesswork is gone.

## DE-CLUTTERED DESIGN:

With simple half & full MIL markings on the elevation & windage axis, and the absence of holdover dots, the shooter gets a clear view of his target with no distractions.

## NUMBERED MARKINGS:

Numbers on both the horizontal and vertical axis allow shooters to quickly find hold points in pressure situations.

## ILLUMINATION:

The reticle is illuminated extensively along both the horizontal and vertical axis, allowing the shooter to make use of the hash markings in adverse light conditions.
